Four trees were uprooted. One fell on a house. Power poles and lines were down near the intersection of Shawnee Ave. and French Valley Rd.

Showers and storms moved southeast across the lower Ohio Valley through the day on April 11 as a cold front slowly tracked across the area. A few of these storms became severe during the afternoon hours across south central Kentucky as they encountered more unstable air. These storms produced a few damaging wind gusts across this region.

Date/Time

Location

Injuries Crop Dma Trees were blown down. Over the space of about four hours from late on April 19 into the early morning hours of April 20, 2011, a squall line brought a historic number of tornadoes to southern Indiana and central Kentucky. Storm surveys over the subsequent few days uncovered 25 tornadoes -the most ever recorded here in one outbreak. On the 19th, low pressure had organized over southeast Kansas with a stationary front reaching east into the central Appalachians. Plentiful moisture streamed northward from the Gulf of Mexico ahead of the system. The Kansas low moved along the front and swung a cold front eastward. Instability, strong upper level winds, and significant changes in wind speed and direction with height helped cause a large squall line to develop ahead of the low and its cold front. The squall line caused severe weather from the eastern Great Lakes to the Red River Valley. Over two dozen tornadoes spun up along the line as it crossed southern Indiana and central Kentucky. Despite the numerous twisters and the fact that they struck during the overnight hours, there were no fatalities or injuries. JEFFERSON COUNTY --- 2.4 NE LOUISVILLE [38.26, -85.75], 2.2 W INDIAN HILLS [38.28, -85.69], 0.8 SSE GOOSE CREEK [38.31, -85.64], 0.8 NW GOOSE CREEK [38.33, -85.66], 3.7 NNE LOUISVILLE [38.28, -85.75] 04/22/11 20:20 EST Flood (due to Heavy Rain) 04/30/11 23:59 EST Source: River/Stream Gage The Ohio River above Louisville's McAlpine Lock and Dam crested around 31.3 feet at 515 PM EST on April 27. Flood stage at this site is 23 feet. Much of River Road is flooded at this level, along with the Third Street Ramp off Interstate 64. Tenth and 27th Streets are closed at the floodgates. Parts of Utica, IN are flooded. The river remained above flood stage through early May.
